

ANSYS Class3 Error Report

ERROR NO:

2014-19

Keywords:

EXPLICIT RIGID BODY PROBE

Description of Error:

For an Explicit analysis, values returned for a probe scoped to a rigid body are incorrect. The minimum and maximum values are incorrectly obtained by querying the nodes of a single element on the body, rather than all elements on the body.

Typical GUI Path(s):

For an Explicit analysis, insert a probe, scope to a rigid body and evaluate results.

Other Comments:**First Incorrect Version:**

Release 12.0

Corrected In:

Release 16.0

Suggested User Action For Running on Uncorrected Version:

Minimum and maximum values for rigid bodies can be obtained by using a user result.
